Journal of Aerosol Science

J. Aerosol Sci.

An International Journal

In association with the Gesellschaft für Aerosolforschung

VOLUME CONTENTS AND AUTHOR INDEX

VOLUME 13, 1982

VOL.
13
1982

Founded in 1970 for the publication of original research on aerosols in the scientific tradition of:

1869	*Tyndall*	*Detection*
1869	*Lister*	*Asepsis*
1871	*Kelvin*	*Nucleation*
1876	*Maxwell*	*Equipartition of energy*
1885	*Aitken*	*Atmospheric particles*
1905	*Einstein*	*Diffusion and Brownian motion*
1908	*Mie*	*Light scattering*
1917	*Smoluchowski*	*Coagulation*
1923	*Millikan*	*Electronic charge*
1930	*Whytlaw–Gray*	*Smokes*

Publishing and Advertising Offices: Headington Hill Hall, Oxford OX3 0BW, U.K.

Annual subscription rate (1983, *including postage and insurance*): For libraries, research establishments and all other multiple-reader institutions, U.S.$160.00. *Two-year subscription rate* (1983–84): U.S.$304.00. *Specially reduced rates to individuals:* In the interests of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual, whose institution takes out a library subscription, may purchase a second or additional subscription for personal use at a much reduced rate of U.S.$45.00. Subscription enquiries from customers in North America should be sent to Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A. and for the remainder of the world to Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, U.K. Published bi-monthly.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

U.S. Copyright Law Applicable to Users in the U.S.A.
The Article Fee Code on the first page of an article in this journal indicates the copyright owner's consent that, in the U.S.A., copies may be made for personal or internal use provided the stated fee for copying, beyond that permitted by Sections 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance should be forwarded with a copy of the first page of the article to the Copyright Clearance Center Inc., 21 Congress Street, Salem, MA 01970. If a code does not appear copies of the article may be made without charge, provided permission is obtained from the publisher. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works or for resale. Specific written permission must be obtained from the publisher for such copying.
In case of doubt please contact your nearest Pergamon office.

Microform Subscriptions and Back Issues

Back issues and all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

CONTENTS

NUMBER 1

D. Corr, M. Dolovich, D. McCormack, R. Ruffin, G. Obminski and M. Newhouse	1	Design and characteristics of a portable breath actuated, particle size selective medical aerosol inhaler
A. T. Cocks and R. P. Fernando	9	The growth of sulphate aerosols in the human airways
B. Z. Gorbunov and N. A. Kakutkina	21	Ice crystal formation on aerosol particles with a non-uniform surface
B. T. Chen and T. T. Mercer	29	An extension to the Kyle theory for determining particle concentration by statistics
K. R. May	37	A personal note on the history of the cascade impactor
V. Prodi, T. De Zaiacomo, D. Hochrainer and K. Spurny	49	Fibre collection and measurement with the inertial spectrometer
C. N. Davies and M. Subari✠	59	Aspiration above wind velocity of aerosols with thin-walled nozzles facing and at right angles to the wind direction
A. W. Castleman, Jr.	73	Experimental studies of ion clustering: relationship to aerosol formation processes and some atmospheric implications
	87	Erratum
	89	Book Review
	91	Conference Announcement

NUMBER 2

J. Podzimek and P. C. Yue	93	A note on the use of a photoelectric counter for total particle counting
K. McCusker, F. C. Hiller, J. D. Wilson, P. McLeod, R. Sims and R. C. Bone	103	Dilution of cigarette smoke for real time aerodynamic sizing with a SPART analyzer
D. W. Cooper	111	On the products of lognormal and cumulative lognormal particle size distributions
B. A. Bodhaine and J. M. Harris	121	Calibration formulas for the Pollak condensation nucleus counter
C. S. Liu and J. W. Gentry	127	Charge distribution of ultrafine aerosols undergoing bipolar charging

VOL. 13 1982

S. OHTA	139	On the rate of homogeneous nucleation in ternary systems
	147	Review of Report
	149	Book Reviews
	151	Conference Announcement

NUMBER 3

Abstracts	153	Aerosols in science, medicine and technology. Aerosols in and from industrial processes. The Annual Conference of the Association for Aerosol Research (Gesellschaft für Aerosolforschung
Y. KOUSAKA, T. NIIDA, K. OKUYAMA and H. TANAKA	231	Development of a mixing type condensation nucleus counter
B. W. LOO, C. P. CORK and N. W. MADDEN	241	A laser-based monodisperse carbon fiber generator
R. C. BROWN	249	The behaviour of electrostatic filters made of fibres or sheets arranged parallel to the airflow
W. B. SMITH, K. M. CUSHING, R. R. WILSON and D. B. HARRIS	259	Cyclone samplers for measuring the concentration of inhalable particles in process streams
	269	Book Review

NUMBER 4

G. L. LEONARD, M. MITCHNER and S. A. SELF	271	Experimental study of the effect of turbulent diffusion on precipitator efficiency
J. J. SINGH, A. C. SMITH and G. K. YUE	285	Experimental studies of the ion-induced binary nucleation
R. LEAITCH and W. J. MEGAW	297	The diffusion tube; a cloud condensation nucleus counter for use below 0.3% supersaturation
A. P. OWONO	321	Trace element analysis of filter and impactor samples of atmospheric aerosols by photon induced X-ray fluorescence
N. A. FUCHS	327	Thermophoresis of aerosol particles at small Knudsen numbers: theory and experiment
Y. S. MAYYA, S. K. DUA and P. KOTRAPPA	331	Diffusion of radon gas and its progeny in a narrow slit parallel plate mobility spectrometer
F. C. HILLER, M. K. MAZUMDER, J. D. WILSON, P. C. MCLEOD and R. C. BONE	337	Human respiratory tract deposition using multimodal aerosols

VOL. 13 1982

JOURNAL OF AEROSOL SCIENCE

In association with the Gesellschaft für Aerosolforschung

Aims and Scope

The aim of the Journal is to encourage the submission of original, well-documented papers on all aspects of aerosol research. Areas covered include:

Basic aerosol formation, processes and reactions; chemistry; mechanics; optics, electrostatics; analysis; electromagnetic, acoustic and nuclear radiations; diffusion processes; mobility; condensation and evaporation; heat motion; energy distribution; forces of attraction and repulsion; turbulence; coagulation; deposition; biological action; inhalation; nucleation; microscopy and electron microscopy; instrumentation.

Papers will be subjected to constructive criticism by identified referees who will discuss them with authors as far as is required.

The Journal will publish research work and occasional reviews of recent work of basic scientific value. The intention is also to encourage the presentation of results in forms which can be generalized as far as possible, rather than the restricted presentation of most applied research.

Notes for Contributors

1. Manuscripts intended for publication in the Journal should be submitted to one of the members of the Editorial Board, whose names and addresses are printed on the inside front cover of the Journal.

2. Authors are requested to submit 3 typed manuscripts in *double spacing* (1 original plus 2 copies). The text must be ready for printing as substantial changes at proof stage are unacceptable. An abbreviated version of the paper's title should be supplied by the author for the running heads. Please note that the original manuscript and diagrams will be discarded one month after publication unless the Publisher is requested to return original material to the author, on submission of the manuscript.

3. Any Greek letters, or special symbols likely to be unfamiliar to the printer, should be identified in the margin the first time they occur on each page of the manuscript.

4. The paper should commence with an abstract of up to about 150 words.

5. Illustrations should not be inserted in the pages of the manuscript but should accompany the manuscript on separate sheets. However, the position of figures and tables in the text should be indicated where desired. The captions for both figures and tables should be typed on a separate page at the end of the manuscript and not included in the text or under the illustrations.
Half-tone illustrations should be kept to a *minimum*. If any lettering must appear on a photograph, two prints should be submitted, one clearly lettered and the other without inscription. Line drawings should be drawn clearly, in Indian ink if possible and about double the intended size. Lines should be thick enough to be clear when the illustration is reduced to a size suitable for inclusion in the Journal. Lettering should either be stencilled in Indian ink, or added by dry-transfer lettering again large enough for the necessary reduction. Tables also should be suitable for direct reproduction. For guidance as how best to prepare figures and tables please consult the photoreprographic department of your institution.

6. References to literature in the text should be quoted in the form Jones (1950), or Jones *et al.* (1950) if there are three or more authors. The list of references should be given at the end of the text in alphabetical order (author's surname first). The title of the journal should be abbreviated as in *World List of Scientific Periodicals* (4th edition). Examples are:

   Frisby, C. B. (1954) *Industrial Medicine and Hygiene* (Edited by Merewether, A.) Vol. II, p. 16. Butterworths, London.

   Harris, C. M. (Editor) (1957) *Handbook of Noise Control*. McGraw-Hill, New York.

   Johnston, C. M. (1953) *Br. J. ind. Med.* **10**, 41.

   B.S. 2980 (1958) *British Standard for Pure Tone Audiometers*. British Standards Institution, London.

7. A reprint order form will be sent out with proofs so that authors may order reprints at a reasonable price.

8. Proofs will be sent to the first-named author for correction, unless otherwise specified, and he should ensure these are restricted to printer's errors; any other substantial corrections will be charged to the author.
